DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: The status of the parent application cited on the first page of the specification needs updated.

Appropriate correction is required.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 32 and 61 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Both claims have limitations directed to a person which is non-statutory subject matter.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-70 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-45 of copending Application No. 10/632,717. Although the conflicting claims are not identical, they are not patentably distinct from each other because the patentable navigation limitations are substantially the same with the only differences being the transportation housings of the device. It is old and well known to use navigation devices in both types of housings. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use the navigation limitations claimed in application 10/632,717 in the housing device of 10/768,309.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
